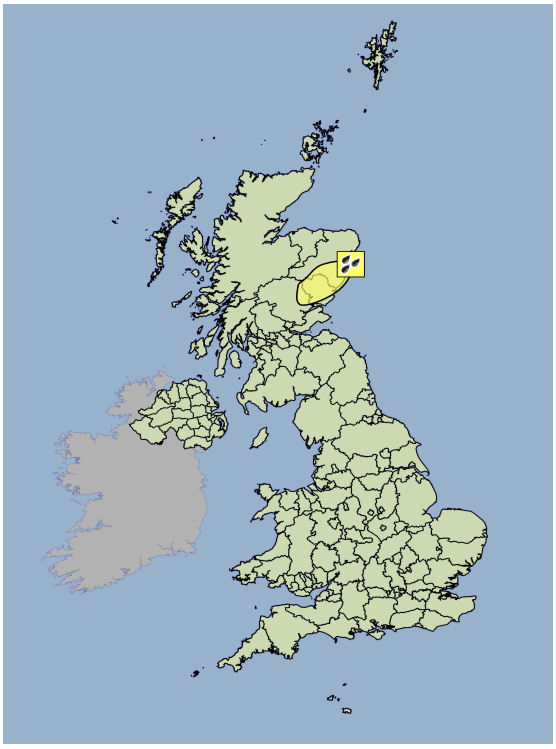
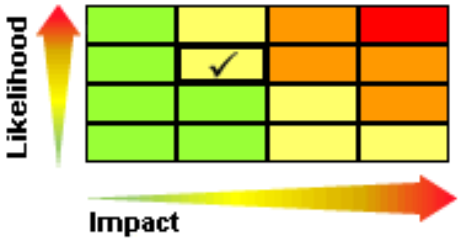
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
After a drier spell during the day on Sunday, a warm front returning from the east will bring further outbreaks of rain to Eastern Scotland from Sunday evening and lasting through most of Monday. Due to strengthening east or northeasterly winds the rain will be most persistent over higher ground where 20-30mm is likely to accumulate, and perhaps 40mm on the hills. The rain will turn more showery on Monday evening or overnight though the timing of this transition is uncertain, so the warning will be kept under review.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:05 on Mon, 17th Nov 2014** until **23:45 on Mon, 17th Nov 2014**

Outbreaks of rain will return to Eastern Scotland on Sunday evening and will continue overnight and for most of Monday. While this rain won't be particularly heavy, its persistence over saturated catchments could lead to some minor flooding impacts on some roads and low lying land.

This warning has now been cancelled, as rainfall amounts are not expected to produce substantial impacts.
